MICRODYN-NADIR launches a fresh look as part of MANN+HUMMEL

Wiesbaden, Germany, 24 June 2019 – MICRODYN-NADIR, a membrane manufacturer, today launched its new corporate brand look to reflect its global outlook. The bright green colors align with its parent company, MANN+HUMMEL, but also demonstrate its ties to the environment as a membrane manufacturer for water, wastewater, and process products.

“Our customers remain the focus of everything we do as we reposition ourselves in the global market and boost our capabilities. We are proud to be partnering more closely with our parent company,” said Walter Lamparter, MICRODYN-NADIR CEO.

Throughout the color changes, acquisitions, and new product lines, the company vision remains unchanged: make the world a better place by supplying superior membrane solutions that lead to clean water.

MICRODYN-NADIR has been part of MANN+HUMMEL since 2015, operating as the water business unit within the Life Sciences & Environment (LS&E) segment of the global filtration titan. The company's investment in LS&E allows MICRODYN-NADIR to continue in a growth pattern. The new corporate brand reflects the future plans the company envisions as part of LS&E.

The fresh look includes a redesign of the logo and an updated website, product packaging, and trade show presence. Visit www.microdyn-nadir.com to explore the changes.

###

About MICRODYN-NADIR

MICRODYN-NADIR, part of the MANN+HUMMEL Group, is a global membrane manufacturer that delivers the membrane products to meet customers' water and process needs. They offer the widest range of membrane products, including microfiltration, ultrafiltration, nanofiltration, and reverse osmosis in flat sheet, spiral-wound, and hollow-fiber configurations, as well as MBR technology for treatment of water and wastewater. The company is headquartered in Wiesbaden, Germany with locations in the USA, Italy, China, Singapore, and Brazil.

About MANN+HUMMEL

MANN+HUMMEL is a leading global expert for filtration solutions. The company group with its headquarters in Ludwigsburg, Germany, develops solutions for motor cars, industrial applications, clean air in interior spaces and the sustainable use of water. In 2018, the group achieved sales of approx. 3.96 billion euros worldwide with more than 20,000 employees at more than 80 locations. The products manufactured by the group include air cleaner systems, intake manifold systems, liquid filter systems, plastic components, filter media, cabin filters, industrial filters, and membrane filters.
