

# Safety Data Sheet

## TriClean™ 210

Issue Date: 01-Jul-2019

### 1. Product and Company Identification

- 1.1 Product Name:** TriClean 210
- 1.2 Intended Product Use:** Reverse Osmosis Membrane Cleaner
- 1.3 Details of the SDS Supplier**  
MICRODYN-NADIR US, Inc.  
93 South La Patera Lane, Goleta, California 93117, USA  
Phone: +1 805-964-8003 Fax: +1 805-964-1235
- 1.4 Emergency Telephone Numbers**  
+1 877-741-1029 (USA)  
+1 760-602-6096 (International)

### 2. Hazards Identification

- 2.1 Classification of the Substance or Mixture:**  
Skin Irritant Category 2, Eye Irritant Category 2, Respiratory Sensitizer Category 1, Skin Sensitizer Category 1

**2.2 GHS Label Elements and Precautionary Statements**

Signal Word:

Danger

Pictogram(s):

Hazard Code(s):

H315

H319

H335

H317

H334

Hazard Statement(s):

Causes skin irritation.

Causes serious eye irritation.

May cause respiratory irritation.

May cause an allergic skin reaction.

May cause allergy or asthma symptoms or breathing difficulties if inhaled.

Precautionary Code(s):

P280

P302 + P352

Precautionary Statement(s):

Wear protective gloves/protective clothing/eye protection/face protection.

IF ON SKIN: Wash with plenty of soap and water.

P304 + P340

IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P305 + P351 + P338

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinse.

P337 + P313

If eye irritation persists. Get medical advice/attention.

### 2.3 Hazards not covered by GHS

None.

## 3. Composition/Information on Ingredients

### 3.1 Substances

Component	CAS Number	Concentration
Organic Acid	77-92-9	85-90 wt%
Chelating Agent	10124-56-8	10-15 wt%

## 4. First Aid

### 4.1 Description of Aid Measures

General Advice:

Move effected personnel out of dangerous area. Consult a physician. Show this safety data sheet to the doctor in attendance.

If Inhaled:

If breathed in. move person into fresh air. If not breathing, give artificial respiration. Consult a physician IMMEDIATELY.

In Case of Skin Contact:

Wash off with soap and plenty of water. Consult a physician in the event of persistent irritation.

In Case of Eye Contact:

Rinse thoroughly with plenty of water for at least 15 minutes. Consult a physician IMMEDIATELY.

If Swallowed:

Never give anything by mouth to an unconscious person. Rinse mouth with water. Consult a physician.

### 4.2 Most Important Symptoms and Effects, Both Acute and Delayed

The most important known acute symptoms and effects are described in sections 2 of this safety sheet. Due to the corrosive nature of some materials contained within this product ingestion may lead to ulceration or perforation of the digestive tract.

### 4.3 Indication of Any Immediate Medical Attention and Special Treatment Needed

No additional data available.

## 5. Fire Fighting Measures

### 5.1 Suitable Extinguishing Media

Use water spray, alcohol resistant foam, dry chemical, or carbon dioxide.

### 5.2 Special Hazards Arising From the Substance or Mixture

Dry powder forms a mildly corrosive acidic solution when mixed with water. Thermal decomposition and vaporization may produce toxic gases/vapors/fumes of carbon oxides and oxides of phosphorous.

### 5.3 Advice for Firefighters

Wear self-contained breathing apparatus and full protective clothing.

### 5.4 Further Information

No additional information.

## 6. Accidental Release Measures

### 6.1 Personal Precautions, Protective Equipment and Emergency Procedures

Use personal protective equipment described in section 8 of this safety sheet. Avoid breathing dust or vapors. Ensure adequate ventilation when mixing cleaning solutions.

### 6.2 Environmental Precautions

If this product is released into the environment, take immediate steps to stop and contain the release. This material is soluble in water. Take adequate steps to avoid contamination of waterways. Notify downstream users of possible contamination should a release occur and notify local, state, and federal authorities as required.

### 6.3 Methods and Materials for Containment and Cleaning Up

Sweep and shovel dry powders. Dissolved or partially wetted material can be absorbed with inert media (e.g. dry sand or earth). Keep recovered material in a suitable closed container for disposal.

## 7. Handling and Storage

### 7.1 Precautions for Safe Handling

Avoid spillage or contact with skin and eyes. Provide adequate ventilation to avoid the formation and inhalation of dust. Use personal protective equipment listed in section 8 of this safety sheet when mixing or handling this material.

### 7.2 Conditions for Safe Storage

Store in a dry and cool place, keep containers tightly closed. Do not use containers made of carbon or mild stainless steels. Protect against physical damage to containers. The recommended storage temperature for this material is 10-30°C (50-86°F).

## 8. Exposure Controls/Personal Protection

### 8.1 Control Parameters

American Conference of Industrial Hygienists (ACGIH), National Institute for Occupational Safety and Health (NIOSH), and the Occupational Safety and Health Administration (OSHA) have not developed exposure limits for this product. The following exposure limits are given for particles not otherwise classified by these institutions.

ACGIH (Total Inhalable Fraction): 10mg/m<sup>3</sup>

ACGIH (Respirable Fraction): 3mg/m<sup>3</sup>

OSHA (Total Inhalable Fraction): 15mg/m<sup>3</sup>

OSHA (Respirable Fraction): 5mg/m<sup>3</sup>

## 8.2 Appropriate Engineering Controls

Handle in accordance with good industrial hygiene and safety practice. Personnel handling this material should use appropriate safety goggles, clothing, and gloves. Wash hands before breaks and at the end of workday. Provide eye wash station, safety shower, as well as sufficient ventilation to prevent dust formation.

## 8.3 Personal Protective Equipment

### Eye/Face Protection

Safety glasses with side-shields conforming, tested, and approved under appropriate government standards such as NIOSH (US) or EN 166(EU). DO NOT wear contact lenses when mixing this product in solution.

### Skin Protection

Wear appropriate protective clothing to prevent exposure and skin contact. When handling this product use gloves made from nitrile rubber, neoprene, butyl rubber, viton, polyethylene, or PVC. Inspect gloves prior to use and use proper glove removal techniques to avoid skin contact. Work boots are appropriate for normal handling. Impervious apron, gloves, or gauntlets should be used when mixing cleaning solutions. When mixing or in the case of spills rubber overshoes are recommended. Properly discard contaminated gloves after use. Wash and dry hands.

### Respiratory Protection

Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) for respiratory protection when dust exposure is expected or when mixing cleaning solutions with this product. For nuisance exposures use type P95 (US) or type P1 (EU EN 143) particle respirator. For higher level protection use type OV/AG/P99 (US) or type ABEK-P2 (EU EN 143) respirator cartridges.

## 9. Physical and Chemical Properties

### 9.1 Information on Basic Physical and Chemical Properties

(a) Physical State:	Solid
(b) Appearance:	White Crystalline Powder
(c) Odor:	Odorless
(d) Odor Threshold:	Not Applicable
(e) pH:	pH 2-3 at 20 g/L
(f) Melting/Freezing Point:	> 150 °C
(g) Initial Boiling Point and Boiling Range:	Decomposes > 175 °C
(h) Flash Point:	No Data Available
(i) Evaporation Rate:	Not Applicable
(j) Flammability:	No Data Available
(k) Upper/Lower Flammability or Explosive Limits:	No Data Available
(l) Vapor Pressure:	Not Applicable
(m) Vapor Density:	Not Applicable
(n) Relative Density:	1.50-1.70 (g/cm <sup>3</sup> )
(o) Water Solubility:	300-400g/L at 25 °C
(p) Partition Coefficient: n-Octanol/Water	No Data Available

(q)	Auto-Ignition Temperature:	No Data Available
(r)	Decomposition Temperature:	> 175 °C
(s)	Viscosity:	Similar to Water in Solution

## 10. Stability and Reactivity

### 10.1 Reactivity

Reactive with oxidizing agents. This product contains an organic acid and may react with alkaline and caustic materials.

### 10.2 Chemical Stability

This product is stable under conditions when following recommended use.

### 10.3 Possibility of Hazardous Reactions

No data available.

### 10.4 Conditions to Avoid

Avoid contact with strong oxidizing agents as well as strong bases. Avoid high temperatures and moisture to protect the product quality.

### 10.5 Incompatible Materials

Strong oxidizers, strong bases, and metallic nitrates. Product contains an organic acid and can be mildly corrosive to metals with prolonged exposure.

### 10.6 Hazardous Decomposition Products

Thermal decomposition and vaporization may produce toxic gases/vapors/fumes of carbon oxides and oxides of phosphorous.

## 11. Toxicological Information

### 11.1 Likely Routes of Exposure

Inhalation, ingestion, or eye contact.

### 11.2 Acute Toxicity

This product is harmful if ingested potentially causing chemical burns, ulceration or perforation of the digestive tract, stomach pain, vomiting, and discomfort if swallowed. Testing of individual chemical components contained in this product have founds its ingredients to exhibit acute toxicity in the following ranges under OECD Test Guidelines 402 and 403.

LD<sub>50</sub> (Oral) - Rat: 3000-5000 mg/kg

LD<sub>50</sub> (Inhalation) - Rat: > 3.60 mg/L 4 Hour Exposure

#### Skin Corrosion/Irritation

Dry powders or concentrated liquid solutions may cause skin irritation or burns depending on the concentration and duration of exposure. Testing of individual chemical components contained in this product have founds its ingredients to cause mild skin irritation under OECD Test Guideline 404.

### Serious Eye Damage/Irritation

Dry powders or concentrated liquid solutions may cause permanent damage or irritation depending on the concentration and duration of exposure. Testing of individual chemical components contained in this product have found its ingredients to cause eye irritation under OECD Test Guideline 405.

### Respiratory or Skin Sensitization

Prolonged or repeated exposure may cause allergic reactions in certain individuals. Direct inhalation may cause irritation to severe burns of the nose, throat, and lungs depending on the concentration and duration of exposure.

#### **11.3 Germ Cell Mutagenicity**

No data available.

#### **11.4 Carcinogenicity**

No component of this product present at levels greater than or equal to 0.1% is identified as a probable, possible or confirmed human carcinogen by IARC, ACGIH, NTP, or OSHA.

#### **11.5 Reproductive Toxicity**

No data available.

#### **11.6 Specific Target Organ Toxicity - Single Exposure**

No data available.

#### **11.7 Specific Target Organ Toxicity - Repeated Exposure**

No data available.

#### **11.8 Aspiration Hazard**

No data available.

## **12. Ecological Information**

### **12.1 Toxicity**

This product may be harmful to aquatic life if released in sufficient concentrations. The toxicity of this product is primarily associated with pH when dissolved in water. Testing of individual chemical components contained in this product have found its ingredients to exhibit toxicity towards aquatic organisms in the following ranges under OECD Test Guidelines 201, 202, and 203.

#### Toxicity to Fish

LC <sub>50</sub> Leucius Idus Melantous (Orfe):	440-760 mg/L	(96 hours)
LC <sub>50</sub> Oncorhynchus Mykiss (Rainbow Trout):	100-1000 mg/L	(96 hours)

#### Toxicity to Invertebrates

EC <sub>50</sub> Daphnia Magna (Water Flea):	500 mg/L	(24 hours)
EC <sub>50</sub> Daphnia Magna (Water Flea):	485 mg/L	(48 hours)

Toxicity to Algae

EC<sub>50</sub> Desmodosmus Subspicatus (Green Algae): 100 mg/L (72 hours)

Growth Inhibition

#### **12.2 Persistence and Degradability**

No data available.

#### **12.3 Bioaccumulative Potential**

No data available.

#### **12.4 Mobility in Soil**

No data available.

#### **12.5 Results of PBT and vPvB Assessment**

PBT/vPvB assessment not available as chemical safety assessment not required/not conducted

#### **12.6 Other Adverse Effects**

No data available.

### **13. Disposal Considerations**

#### **13.1 Waste Disposal**

Spent Cleaning Solution

Spent cleaning solutions should be disposed of in accordance with local, state, and federal regulations governing individual users or sites.

Unused Product

Unused product should be disposed of at an approved waste treatment/disposal facility in accordance with applicable local, state, and federal regulations. Do not dispose of unused product through normal garbage or sewer systems.

Contaminated Containers

Treat contaminated containers in the same manner as unused product for the purpose of disposal.

### **14. Transportation Information**

#### **14.1 DOT (US Department of Transportation)**

Not dangerous goods.

#### **14.2 IMDG (International Maritime Dangerous Goods)**

Not dangerous goods.

#### **14.3 IATA (International Air Transportation Association)**

Not dangerous goods.

## 15. Regulatory Information

### 15.1 US Federal Regulations

#### SARA 302 Components

This product does not contain chemical components subject to the reporting requirements of SARA Title III, Section 302.

#### SARA 313 Components

This product does not contain chemical components that exceed the threshold reporting limits of SARA Title III, Section 313.

#### SARA 311/312 Hazard Category

Acute health hazard.

#### TSCA (US Toxic Substances Control Act)

All components of this product are listed on the TSCA inventory.

### 15.2 US State Regulations

#### California Proposition 65 Components

This product does not contain any chemicals known to the State of California to cause cancer, birth defects, or any other reproductive harm.

#### Massachusetts Right to Know

Sodium Hexametaphosphate                      CAS No: 10124-56-8

#### New Jersey Right to Know

Sodium Hexametaphosphate                      CAS No: 10124-56-8

Citric Acid    CAS No: 77-92-9

#### Pennsylvania Right to Know

Sodium Hexametaphosphate                      CAS No: 10124-56-8

Citric Acid    CAS No: 77-92-9

**16. Other Information**

**16.1 Hazardous Material Information System (HMIS III)**

HEALTH	3	Serious Hazard
FIRE	1	Slight Hazard
PHYSICAL HAZARD	0	Minimal Hazard
PPE	E	Safety Glasses, Gloves, and Dust Respirator

**16.2 National Fire Protection Association (NFPA Standard 704)**

**16.3 Revision Information**

Product: TriClean 210  
Revision: 1  
Issue Date: 01-Jul-2019

**16.4 Further Information**

The information contained in this sheet is believed to be correct but does not purport to be all inclusive and should be used only as a guide. The information in this document is based on the present state of knowledge and relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process. This information is, to the best of MICRODYN-NADIR US, Inc.'s knowledge and belief, accurate and reliable as of the date indicated. However, no warranty guarantee express or implied is made with respect to such information. Users should make their own investigations to determine the suitability of the information for their particular purposes.
